

Spring & Summer-2022 Undergraduate Research Assistant Opportunity!

Ruminant Nutrition and Life Cycle Assessment (RuNLCA) Modeling Lab

- Are you interested in learning and exploring new things?
- Do you know that ruminants contribute to climate change due to greenhouse gas emissions such as methane and nitrous oxide?

Benefits

- Build your resume for grad school
- Gain valuable research experience
- Be part of a diverse research team
- Possibly attend & present at conferences

Requirements

- Minimum of 3.0 GPA
- Interested in working with in-vivo experiment involved ruminants
- Motivated and committed to do the assigned work
- Must be a team player

Application

- Email to Dr. Elias Uddin at mdelias.uddin@sdstate.edu showing your interest including CV

Lab website

- <https://www.sdstate.edu/directory/elias-uddin>

- Come join RuNLCA Lab in evaluating the enteric methane mitigation strategies in ruminants using in-vivo animal experiment
